New - item T-Slot Slider

The new item T-Slot Slider allows the easy design of sliding guides and automation devices guided along the profile groove 8 of the item MB Building Kit System. The slide guide of stable die-cast zinc is equipped with inserts made of a special plastic, which guarantee best sliding properties even under unfavourable ambient conditions.

Components can be attached to the slide using insert nuts M6, the load-bearing capacity being $F_{max} = 50 \text{ N}$ for the slide guide.

The installation of the slide on profile frames using special fastening sets facilitates the assembly and allows automatic adjustment of slide elements.

Fixed and floating bearing are fastened on the base of the profile groove by means of screws.

The item Industrietechnik GmbH from Solingen is the developer and supplier of the MB Building Kit System, which provides individual solutions for the manufacture of industrial production equipment. The System focuses on aluminium profiles, harmonising fastening technology and diverse functional components.
