New - Ball Joint 8 in item Building Kit System

With Ball Joint 8 from the MB Building Kit System, item adds another products to its wide range of fastening elements. This absolutely unique product is ideal for the design of workplaces and offers almost unlimited adjustment possibilities for flat screens, cameras, lighting and similar components.

A double ball joint with securing over clamping jaw combines a 180° swivel movement to a 360° rotation. This way, any angle position can be adjusted in one half around the fastening point. True to the principle of modularity of the item MB Building Kit System, Ball Joint 8 can be combined to any Profile of Line 8. Components are attached by means of a simple securing screw. Instead of the securing screw, Ball Joint 8 is also available in a variation with a Clamp Lever for rapid manual adjustments.

The easy adjustment combined to maximum freedom allows an unrivalled flexibility. The item Ball Joint 8 can be screwed into the profile groove or into the end face of the profile from Line 8 of the item MB Building Kit System.

The item Industrietechnik GmbH from Solingen is the developer and supplier of the MB Building Kit System, which provides individual solutions for the manufacture of industrial production equipment. The System focuses on aluminium profiles, harmonising fastening technology and diverse functional components.
