Short company profile: item

item is a successful, medium-sized group of companies which has dedicated itself to the development and global distribution of high-grade components for the construction of production equipment, machines and other installations.

item supports its customers in implementing several constructions and production installations by means of modular, high-quality products and the associated services. The conscientious selection of raw materials for our products, the application of environmentally friendly, energy-efficient manufacturing and machining processes and a close focus on recyclability, underline our guiding principle of making optimum use of resources.

item is a worldwide acting company: item system elements are successfully used in more than 40 countries around the world. A wide range of high-grade services, ranging from application counselling over excellent supply readiness of products to the assembly of construction solutions, round off our services.

The company's entrepreneurial independence and its sustainable earnings ability are the keystones of its continuous, responsible and growth-orientated corporate policies.

From the very outset of product development, item places emphasis not only on innovation, but also on the design. The products of the MB and RS Building Kit Systems were already awarded in design contests several times.
